

## Trapezoidal nut type FCS - Flanged self-lubricating plastic

**Material: PA 6 + Mo S2 DIN 7728 + additives** This Type of nut is made of a very wear-resistant perfectly self-lubricating plastic. It doesn't require any other lubrication as long as it is in use. The 3 x d length gives better load distribution and limits wear. The flange dimensions make them fully interchangeable with The FTN, FXN, HDL and HAL (total length and flange thickness are variable).
